Abstract:

The artistic school is considered one of the most inspirational sources to designers for its efficiency in intellectual, social and economic life. Designing textile accessories is a plan that is created by the designer to create a new line that complies with these schools and modern trends. This research consists of a study of fauvism and cubism schools to set a new innovate designs for textile accessories depending on the descriptive and functional approach. The findings of this reveal a possibility of fulfilling artistic and aesthetic values that appeared in constructional lines and colors that were inspired by fauvism and cubism schools.
