Abstract:

The Philosophy of Islamic values is the ultimate source of native thought of Muslim Architecture, Islamic architecture stem from Islamic values and teachings of our tolerant religion (Islam), which has not been under the settings of the place or time.

Also the Muslim architecture that reflects the most important Islamic values, including: (aesthetic values -The social values of ulster -the value of spirituality - the value singularity - the value of moderation), and translated into principles based on architecture, interior design and furniture.

The importance of research is to emphasize our Islamic values and to preserve our identity in the light of globalization, distance from our values and heritage, and trying to define those values and disseminate their concepts through designs that emphasize and achieve our Islamic values.

The research aims to promote Islamic values and highlight their importance as a source of design, creative and contemporary thought to design hotel rooms reflecting the content and philosophy of those values.

The research concluded with a series of results, the most important of which are: Islamic values are the philosophy that emanated from the principles and foundations of the interior design of Islamic architecture, the achievement of Islamic values and the internal design and values. Which have been confirmed by choosing accommodation rooms in tourist facilities because they have an effective role in spreading our culture and values in the light of the multiplicity of cultures and contemporary values on the world stage, and highlighting the role of these values in communicating with contemporary design movement.
