

**Platforms of Zagazig city mosques inn 13<sup>th</sup> to 19<sup>th</sup> century Hijiry year  
Atistic archaeological study.  
Dr/RawyaAbd el-menam Khalil**

Zagazig city though was constructed at the age of Mohamed Ali basha but it was flooded with mosques such as Mohamed Ali mosque near Mowes sea archery which has been built at year 1290 Hijiri/1873 AD. and it was destroyed then rebuilt by his Abbas Helmy the second at 1312 Hijiri /1894 AD. ,Al-aydarosy mosque 1290Hijiri/1873 AD. before Al-wada lake, Al-hariri mosque 1308 Hijiri/1890 AD. atBosna street and Ali Aga mosque 1318 Hijiri/1899 AD.. each one of those mosques has wooden platform and this study is about the platforms exist in the 4 mosques.

About the identification of platform; it is a stand made of wood or bricks that fits to the lecturer of Friday prayer to sit or stand inside it and exist near the sanctuary and the first use of this platforms was at the time of profit Mohamed after he was leaning on tree branch they made him a platform with three steps.

The data about platforms between the first and third century of Hijira is rare and doesn't make us capable of imagining the shape of Islamic platforms at this time beside we didn't reach any complete ones that can help us identify the parts and components of platforms at this time.
