### **Abstract:**

WAPAP Art is an art which redraw faces and shapes with new way, and more active with easy way to know it.

WAPAP Art depends on classification the face or any other shape with modern and new ways.

Divided the shape into small pieces, colored every piece with different color, and classification the pieces to dark colors and bright color.

Use the strait line to make the sides of each piece, which give the shape stronger look than the weave line.

WAPAP Art use acute colors, ignore the degradation way of colors we know, to appear the power of uses colors, and give 3D shapes.

In this paper we use the idea of WAPAP Art which depends on strait lines and polygon shapes to make some Textile Designs, which can Applied in Weaving Machine as a Textile Fabrics.

And Make some groups of Colors, Use ordinary weave Construction to implementation one of these designs.
