knowledge Economy Support Concept Entrepreneurship

The research discusses a very important issue which is entrepreneurship and ways to reach a scientific methodology and a basis on which the designer depends to be a successful pioneer and to reach to be a successful entrepreneur and achieve the basic goal of the research we had to review the basic and consistent concepts of the knowledge economy where it is the main engine of Support for industrial, engineering and traditional work and through it was achieved to create a new model adapted to the economy of knowledge supports the concept of entrepreneurship and this model was quoted from the basic model of knowledge economics, which depends on three basic pillars, namely education, creativity, knowledge and that concept. Emerged due to the unremarkable development of the information revolution and the ways of obtaining information, with the development of society and its transformation into a digital society, which depends on the basic pillars which is the technological base and knowledge base and the base of services that include infrastructure and its requirements and as a result of the development of the concept Entrepreneurship in different fields we had to focus on developing this concept to support the designer to become a successful pioneer and therefore this quoted model, which is based on the basic quotes, is ...

The search plan includes a range of integrated phases

First stage, the survey and information gathering phase: at this stage the available knowledge parts of the subject of the research are collected, the most important of which are:

The concept of knowledge economy and the clarification of the basic concepts and pillars on which knowledge economy depends, namely knowledge, education and creativity

A second phase, which is the stage of analysis of information and analysis of previous concepts and linking them to each other and then reaching a model of entrepreneurship based on the corresponding elements of those elements on which the knowledge economy and those elements are represented in knowledge of the economy and the education of design and the experience of creativity
