Abstract:

Formation of the Egyptian citizen is the Egyptian government's first priority as the human wealth is the most important capital. It is well known that the more investment in the human factor, the faster the nations' progress is achieved. Thus, developing education is an inevitable necessity for achieving the sustainable development, as it is considered the corner stone for renaissance and progress; therefore, the future educational system in Egypt was directed to be reformed to establish a highly strong, cultured and conscious mindful generation .

In the shade of the national project of developing education in Egypt, school books and teaching strategies have been changing without regarding of classrooms interior design. Whereas classrooms interior design lacks a lot of environmental, emotional, social, physical and psychological effects in a way blocking the achieving of new educational system's philosophy and goals. From this point, the research's problem comes.

So the research aims at studying interior spaces for classrooms to evaluate the current situation and monitor weak points that affect motivating the learner during the educational process. Also it aims at giving solutions in interior design contributing to applying the new educational system effectively in a way appropriate to Egypt's position and history as it has been the flame that illuminates the journey of human civilization.

Through merging between classrooms interior design elements, students learning styles and the new educational system philosophy, the research could find some criteria that enhance thinking and creativity for students. The research recommends caring for design and applied researches in the field of the primary schools and also using interior designers to find nontraditional solutions to face drawbacks in classrooms in the new educational system.

Key words:

Interior design – Classrooms – Creativity – Innovation – New educational system
