Abstract:

The field of woodworking is one of the fields that researches the permanent development of artifacts through the development of skills in technical and industrial processes to serve the aesthetic and technical aspects besides the public benefit, which casts a shadow on the development of the individual's reality through the occupation of these crafts a large part of the individual's personal life, from this point of view and why For this specialization in terms of technical, technical and utilitarian aspects, the researcher turned to the prospects of benefiting the individual and society by focusing on the development of woodwork and benefiting from it societally within the framework of Egypt's Vision 2030 in the light of the sustainable development strategy as a research engine consistent with development strategies and the use of all resources and tools in advancing the reality and future of the individual and society , Whereas (Egypt Vision 2030 is a national agenda launched in February 2016 that reflects the country's long-term strategic plan to achieve the principles and goals of sustainable development in all fields, and to localize them in the various Egyptian state agencies. Egypt's Vision 2030 is based on the principles of "comprehensive sustainable development" and "regional development" balanced", and Egypt's Vision 2030 reflects the three dimensions of sustainable development: the economic dimension, and the social dimension A, and the environmental dimension

From this standpoint, the researcher sought to adopt one of the objectives of the economics axis of the sustainable development strategy, Egypt Vision 2030, the sixth goal, which is (providing decent and productive job opportunities) (ii). "Banding and turning"

Research problem: To what extent can woodwork be developed as small projects using pressing and wood turning techniques within the framework of the 2030 sustainable development strategy?

The research hypothesis: There is a positive relationship between the study and adoption of one of the goals of the 2030 Sustainable Development Strategy, and the development of wooden crafts as small projects using pressing and wood turning techniques.

The aim of the research: the development of woodwork as small projects using pressing and wood turning techniques within the framework of the 2030 sustainable development strategy.

Keywords

2030 sustainable development strategy - woodwork - small projects - pressing wood - wood turning
