### Abstract:

The stages of development of the modern architecture of Sudan are as follows: colonial architecture, modernity architecture and so And after modernity we find in it contemporary architecture with its various ideas by adding to the smooth architecture (architecture Glass), where each stage of its pioneers of architects contributed to its development, with contributions mentioned, Other architects in aspects of architecture science, as well as illustrating some failures in Sudanese architecture, Let's conclude that the Sudanese architecture has passed through many stages with its architectural product and the contributions of its architecture. And the results and failures made it up and down until the current war broke out. (April 2023) to stop the development of architecture and even demolish parts of the architectural and heritage product also
